

Ayyappa Parimi
parimiayvappa@gmail.com
469-420-0581

Professional Summary:

Overall 6+ years of experience as Java Full Stack Developer in designing and developing enterprise applications using Java 21, Spring Boot, Spring MVC, Microservices, Angular, ReactJS, TypeScript, and JavaScript. Strong background in building REST/SOAP APIs, cloud-native applications, and migrating monolithic systems to microservices architecture. Proficient in MySQL, MongoDB, Hibernate, JPA, Docker, Kubernetes, AWS (Lambda, EC2, S3), Jenkins, GitHub, and CI/CD pipelines. Experienced in TDD, JUnit, Mockito, and leveraging LLMs and Machine Learning for AI-driven test automation. Skilled in delivering scalable, secure, and high-performance solutions throughout the full SDLC using Agile and Waterfall methodologies.

Technical Skills:

Programming Languages	JavaScript, TypeScript, Python3, Java, SQL, C, JEE, SQL, Go, C, C++
Web Technologies	HTML5/HTML, CSS3/CSS, Bootstrap 4, JavaScript ES5/ES6, Python, Angular 17, React, JQuery, AJAX, JSON, Node.js, React.js 15/16, Express.js, TypeScript
Tools	Visual Studio code, Jupyter Notebook
Version Control	GIT, GitHub
Database	Nodejs, MongoDB, AWS, MySQL.
Frameworks	Angular Material, Spring, Spring Boot, DAO in Spring Framework, Angular, Hiberante (ORM)
Debugging Tools	Jest, Mocha
Cloud Technologies & DevOps Tools	AWS, EC2, S3, Docker, ECS, Glacier, Lambda, Kubernetes.
XML	XML, DTD, XSL, XSLT, XHTML, XML Schema and DOM Parsers.
Operating Systems	Windows, Unix/Linux, MAC OS X
AI / Generative AI	OpenAI APIs, GitHub Copilot, LLM Integration.

Professional Experience:

Frost Bank, Dallas, TX
Sr. Java Full Stack Developer

Aug 2023 to Till Date

Responsibilities:

- Developed and maintained scalable enterprise applications using Java 21, Spring MVC, Spring Boot, and Microservices architecture.
- Designed and implemented responsive, user-friendly web interfaces using Angular, TypeScript, React.js, JavaScript, HTML5, and CSS3.
- Developed reusable Angular components, services, and modules to improve application maintainability and reduce development effort.
- Implemented business logic and backend services using Spring Framework modules including Spring MVC, Spring Boot, and Spring Data.
- Utilized JDBC, Spring Data JPA, and Hibernate for database connectivity and persistence layer development.

- Integrated Kafka into a Spring Boot microservice to consume and deserialize high-volume transaction messages using a configurable topic and embedded Kafka test framework.
- Implemented transaction validation and persistence logic with Spring Data JPA and an H2 SQL database, including entity modeling and balance updates across relational User records.
- Connected the service to an external REST Incentive API using RestTemplate, processing incentive response and incorporating them into transactional workflows.
- Developed a REST endpoint for querying user balances, returning JSON responses through a Spring controller while maintaining clean architectural boundaries.
- Verified system behavior using Maven test suites and debugger-driven inspection, ensuring reliability across message ingestion, database operations, and external API interactions.
- Worked with MongoDB and other NoSQL databases to store and manage large volumes of structured and unstructured data.
- Followed Test-Driven Development (TDD) practices to ensure high-quality, maintainable, and reliable code.
- Developed comprehensive unit and integration test cases using JUnit and Mockito, achieving high code coverage and application stability.
- Leveraged Large Language Models (LLMs) and Machine Learning techniques to automate the generation of unit, integration, and API test cases, significantly reducing manual testing effort.
- Containerized applications using Docker and created optimized Docker images for consistent deployments across environments.
- Deployed and managed containerized applications on Kubernetes, including pod management, auto-scaling, service configuration, and monitoring. Built and maintained automated CI/CD pipelines using Jenkins and GitHub, streamlining build, test, and deployment processes.
- Utilized AWS Cloud Services for application deployment, storage, monitoring, and infrastructure management.
- Managed source code repositories using GitHub, following Git branching strategies and collaborative development workflows.

Environment: Java 21, J2EE, Angular 17, TypeScript, JavaScript, React, RxJS, NgRx, Angular Material, HTML5, CSS3, Bootstrap, REST APIs, Spring Boot, Spring MVC, Microservices, Kafka, MongoDB, PostgreSQL, Docker, Kubernetes, Jenkins, AWS, JUnit 5, Mockito, GitHub Copilot, GitHub Actions, Maven, TDD, CI/CD.

NSL Technologies, India
Java/J2EE Developer

Jun 2018 to Jul 2021

Responsibilities

- Developed and maintained enterprise web applications using Java, Spring Framework, and Spring Boot following full Software Development Life Cycle (SDLC) methodologies.
- Designed and implemented responsive, dynamic user interfaces using Angular, ReactJS, JavaScript, TypeScript, HTML5, and CSS3.
- Developed reusable UI components, services, and state management solutions to improve maintainability and user experience.
- Collaborated with UX/UI teams to translate business requirements into interactive and responsive web applications.
- Developed backend business logic using Spring MVC, Spring Core, Spring Data JPA, and Spring Boot.
- Participated in the migration of legacy monolithic applications to Microservices architecture, improving scalability, maintainability, and deployment flexibility.
- Developed and optimized relational database solutions using MySQL, Oracle, and SQL query tuning techniques.
- Worked with NoSQL databases such as MongoDB for handling large-scale and semi-structured data.
- Implemented database design, schema creation, indexing strategies, stored procedures, and performance optimization.
- Developed cloud-native applications and deployed services on AWS EC2 instances for scalable and highly available environments.

- Built serverless solutions using AWS Lambda to process event-driven workloads and reduce infrastructure management overhead.
- Participated in Agile development processes, including sprint planning, backlog grooming, daily stand-ups, and retrospectives.
- Collaborated with cross-functional teams including business analysts, QA engineers, architects, and DevOps teams throughout the SDLC.

Environment: VS code, Git, Spring, Spring Boot, JEE, Hibernate 4.x, Junit, RESTful, Maven, SQL Server, Angular, HTML5, CSS3, SASS, and TypeScript, Spring MVC, Hibernate, React, react-redux, redux-thunk, react-router, and react-bootstrap, Javascript, HTML, CSS, Ajax, Bootstrap.js, JQuery, Visual Studio code, and JSON.

Academics:

Master of Science: Computer Engineering from University of North Texas

Bachelor of Technology: Electrical and Electronics Engineering from JNTU Kakinada

CERTIFICATION:

AWS Certified Solution Architect - Associate: https://www.credly.com/badges/bed1d034-141d-47ba-8278-c400e8524cd4/public_url
